

La Mision Water Co. REPORT

The La Mision Water Company has had a good year, revenues are stable and we have not experienced too many interruptions of supply. Our new well is operating efficiently, albeit with a water quality level somewhat lower than we would like, and Chuy continues to do a good job with maintenance and trouble spotting.

There have been the usual problems with breakages at user's homes that have led to overuse of water, but generally our community is very conscious of water conservation, so give yourselves a big pat on the back.

The Water Company is indebted to Molly Post and Mari and Tom Daniel for their tireless work and the board would like to thank them for their heroic efforts in a truly thankless task. We could not function without the considerable work done by Bruce Fine and Mike and Sherry West. The community owes them a debt of gratitude, as do I.

Ron de Jong
President
La Mision Water Company
